Profile

Self-driven Junior Full Stack Developer transitioning from a rewarding career in HR to tech. With over 5 years of experience in HR coordination, project management, and digital transformation, I bring a unique blend of problem-solving skills, workflow optimization expertise, and a user-focused mindset into software development. Developing expertise in React, Django, Python, and SQL, I specialize in building scalable, user-friendly applications. A solutions-oriented team player eager to contribute to dynamic and innovative development teams while continuously expanding my technical skills.
